## INTRODUCTION

The InFocus® LP260™ multimedia projector is specifically designed for the mobile presenter. It generates crisp, clear images and is easy to connect, easy to use, easy to transport, and easy to maintain.

### Image Resolution

The SVGA resolution of the LP260's projected image is 800x600. The projector cannot compress screen resolutions above 1280x1024. If your computer's screen resolution is higher than 1280x1024, reset it to a lower resolution before you connect the projector.

### Compatibility

The projector is compatible with a wide variety of computers and video devices, including:

- IBM-compatible computers, including laptops, up to 1280x1024 resolution.
- Apple® Macintosh® and PowerBook® computers up to 1280x1024 resolution.
- Most standard VCRs, DVD players, HDTV sources, camcorders and laser disc players.

### Unpacking the Projector

The projector comes with the items shown in Figure 1. Check to make sure all are included. **Contact your InFocus dealer immediately if anything is missing.**

If you are experienced in setting up presentation systems, use the *Quick Start* card that was included in the shipping box. For complete details on connecting and operating the projector, refer to this User's Guide. User's Guides are also available for download from our website at [www.infocus.com](http://www.infocus.com).

A registration card is included in the box. Register to receive product updates, announcements, and special offers from InFocus. Or, register online at [www.infocus.com/service/register](http://www.infocus.com/service/register) and you will be automatically entered to win free merchandise.

**NOTE:** The projector automatically expands 640x480 images to 800x600. You can display these images at their native resolutions using the True feature. See "True" on page 25 for more information.

### Usage Guidelines

- Do not look directly into the projection lens when the lamp is turned on. The bright light may harm your eyes.
- Do not block the grills on the projector. Restricting the air flow can cause it to overheat and turn off. If this happens, you must wait a minute before attempting to turn it back on.
- Handle the projector as you would any product with glass components. Be especially careful not to drop it.
- Avoid leaving the projector in direct sunlight or extreme cold for extended periods of time. If this happens, allow it to reach room temperature before use.
- Transport the projector in a vendor-approved hard or soft case. Part numbers for these cases are listed on page 45.

### If You Need Assistance

The first place to look for help is in this manual. Be sure to check the guidelines in “Troubleshooting” on page 39. Or, check the Service and Support section of our website at <http://www.infocus.com/service>. You’ll find a Technical Library, FAQs, and support contacts including a technical support e-mail form.

If those sources don’t answer your question, call your InFocus dealer. You can also call InFocus Customer Service directly at **1-800-799-9911**. Call between 6 a.m. and 6 p.m. PST, Monday through Friday. Service is available in North America after hours and on weekends for a fee at 1-888-592-6800.

In Europe, call InFocus in The Netherlands at **(31) 35-6474010**. In Asia, call InFocus in Singapore at **(65) 332-0659**.

Or, send us an e-mail at [techsupport@infocus.com](mailto:techsupport@infocus.com)

Our World Wide Web address is <http://www.infocus.com>.

### Warranty

This product is backed by a limited two-year warranty. The details of the warranty are printed at the back of this manual. A longer term warranty can be purchased from your InFocus dealer. Refer to page 45 for the part number.
